Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,7-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gabriel in view of Minamitaka (US Patent No. 5,451,709)

Regarding Claims 3,4,13,14,26,27, Gabriel (See especially Figs. 1-3, Col. 7 lines 6-20, Col. 8 lines 37-44, Col. 12) discloses all features claimed but does not explicitly disclose the automatic composition feature, the display features, the microphone and compression features, or the radio features claimed.

Minamitaka discloses an apparatus for automatically composing a musical piece and playing it in real time (concurrent playback - see Abstract; col. 2 lines 59-64). It would have been obvious to one of ordinary skill in the art to adapt the Gabriel teachings with those of Minamitaka, as both inventions are narrowly directed towards the art of musical devices that enable a user to easily and simply compose musical pieces.

With regard to the display, microphone, and compression features, it is noted that these recited features would have been notoriously old and well-known in the art of computer audio and computer audio software. It would have been obvious to one of ordinary skill in the art to adapt the Gabriel/Minamitaka combination with these

Art Unit: 2837

teachings, so as to be able to expand the number of audio sources available to the user of the Gabriel/Minamitaka device.

Applicant argues that the combination above does not teach processing of voice/sound samples; however, Gabriel teaches audio data which is well known in the art to be considered sound or voice samples (Col. 8, lines 37-44).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, in the knowledge generally available to one of ordinary skill in the art of electronic musical instruments, both Gabriel and Minamitaka are directed towards computer-implemented musical composition inventions, and it is well-known in the art to combine similar programs with similar features when implemented on a personal computer.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2837

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
